NYselections Test Cases - One-Pager

Quick reference of BDD automation completed to date.

Stack

Playwright + Cucumber (BDD-only): Feature → Steps → Page Objects
App: NYselections Lightning (Salesforce) · Reports: Allure + JSON side reports

Run

Command	Purpose
`npm run bdd`	All scenarios
`npm run bdd:tags "@Tag"`	By tag
`npm run bdd:headed`	Visible browser
`npm run report`	Allure report

Inventory (10 features)

Feature	Tag	Case	What it does
Smoke	`@Smoke`	—	Framework launch check (example.com)
Auditor1	`@Auditor1`	00120464	Login, case, party, Primary Auditor, eligibility Yes
Duplicate Transaction	`@DuplicateTransaction`	00120877	Clear all flagged duplicates; assert none remain
Repeat Contributor Code	`@RepeatContributorCode`	00120859	Align codes for same contributor name
Clear Shared Contributor Code	`@ClearSharedContributorCode`	00120859	Clear codes shared across different names
Is District (No)	`@IsDistrict`	00120857	Empty In District Confirmed → No; save
Is District Yes	`@IsDistrictYes`	00120877	Empty In District Confirmed → Yes; save
Verification Agree	`@VerificationAgree`	00120861	Empty Verifier Status → Agree; save
Verification Disagree	`@VerificationDisagree`	00120861	Empty Verifier Status → Disagree; save

Empty Error Message	`@EmptyErrorMessage`	00120861	Accept/Reject blocked when Verifier Status empty

Shared tags on NYselections flows: `@Regression` `@NYselections` `@End_to_End`

Key files

Kind	Path
Features	`features/*.feature`
Steps	`features/step-definitions/*.steps.ts`
Pages	`pages/*.ts`
Full write-up	`docs/TEST_CASES_SUMMARY.md`

Watch-outs

- Case numbers are data-dependent; refresh Examples if env data changes
- Empty Error Message needs at least one empty Verifier Status on 00120861
- Agree / Disagree / Empty Error share Random Sampling Records on the same case
- Contributor-code flows write JSON under `reports/`
